PARTICIPANTS WITH FIBROMYALGIA NEEDED FOR A RESEARCH STUDY

Purpose: To understand the safety and effectiveness of heat intervention (sitting in a hot tub) on pain for individuals with Fibromyalgia.

Looking for Males & Females who:
- Are between 18 and 65 years old -AND-
- Have a diagnosis of Fibromyalgia -AND-
- Live with moderate to severe body pain

What does the study involve?
Hot Tub Visits (10-12 total):
- 2-3 visits per week for 1 month
  - (~1 hour per visit)

Pre and Post Hot Tub Visits (2 total):
- An online survey
- Pain sensitivity testing
- A blood draw

Participants who qualify will be compensated up to $200. There is no cost to participants for any of the treatments.
