Determination of Not Human Subjects Research
The HSC Office can provide investigators with a formal determination of not human subjects research when applicable. The formal determination ensures that federal regulations on human subjects research do not apply to the project. Additionally, the determination letter may be required by funding sources or journals. To request a determination letter, submit the form posted at: http://www2.kumc.edu/researchcompliance/hscforms.htm Include the study protocol. Determinations are typically made within 2 – 3 business days.
