Night @ The Lab is an exciting new project from the KU Medical Center Area Health Education Center. This project has been created to provide an opportunity for high school students to (a) explore the connections between health and science and (b) showcase their knowledge to the community.

The students will research their topic and put together a 3 minute oral presentation with a visual display which will be presented at their regional Night @ The Lab event. One winner from each region will move on to compete at KU Medical Center and be judged by medical experts.
