

# Empowering Participants

Extension for Community Healthcare Outcomes

## Moving Knowledge, Not Patients

ECHO uses video-conferencing technology to offer mentoring. Connect from your computer, with a webcam and microphone, a tablet or smart phone to gain access to case-based learning and interdisciplinary teams.

## Tele-ECHO Model

- Collaborative medical education
- Democratize and de-monopolize medical knowledge linking interdisciplinary specialty team with multiple primary care clinicians
- Experts mentor and share their expertise across a virtual network

## ECHO Partners

- Acquire new skills and competencies
- Become part of a community of practice and learning
- Gain access to inter-professional team of specialty providers and colleagues to offer support in how to manage patients with complex conditions
- Increase their professional satisfaction

## Tele-ECHO Clinic

- Provides rapid dissemination of new knowledge
- Enhances and expands capacity and accelerates collective wisdom
- Promotes consistency in care and practice
- Helps provide better access for patients in rural and underserved communities

## KUMC ECHO Series

# We are no longer the “sage on the stage, we’re the guide by the side”

In collaboration with statewide partners, The University of Kansas Medical Center brings *you* Project ECHO, a tele-mentoring program – Offering *you* additional educational resources to help care for *your* patients or students
