

H.E.L²P³!

It might be Autism

Recent data from the CDC indicates that by the age of 8 years, 1 in every 68 children has a diagnosis of autism spectrum disorder (ASD). Many primary care providers frequently hear the question “Doctor, does my child have autism?”

Providers can begin to answer that question during a well-child visit with the following tools:

- ✓ Identification and recommended screening of ASD
- ✓ Spotting red flags
- ✓ Helping parents of school-aged children concerned about their child’s social skills or behaviors
- ✓ Managing the wait list
- ✓ Treating children following an Autism diagnosis

Join us during Autism Awareness Month
for an Autism ECHO

Tuesday Noon – 1:00 PM

April 3, 10, 17 and 24

Calling all: Primary Health Care physicians, NPs, and PAs and their teams; Behavioral Health Care Providers and their teams.

Let’s create a virtual learning collaborative to explore the methods of development surveillance, screening and referrals. We’ll explore ways to offer Hope, Empathy, Language and Partnership in developing a plan for your patients falling on the autism spectrum.

Thank You:

University of Kansas Medical Center, KU Center for Telemedicine and Telehealth, Telehealth ROCKS, and the US Health Resources and Services Administration

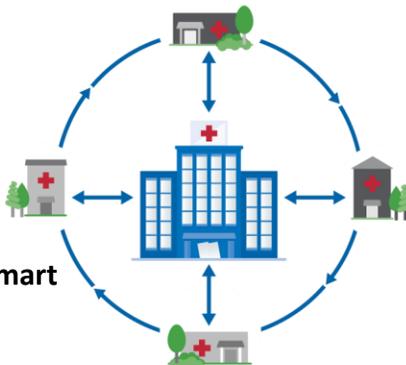

Empowering Providers to Identify and Address Autism

Extension for Community Healthcare Outcomes

Moving Knowledge, Not Patients

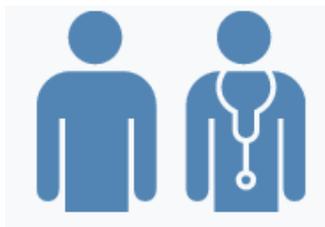

ECHO uses video-conferencing technology to offer mentoring. Connect from your computer, with a webcam and microphone, a tablet or smart phone to gain access to case-based learning and interdisciplinary teams.

Tele-ECHO Model

- Collaborative medical education
- Democratize and de-monopolize medical knowledge linking interdisciplinary specialty team with multiple primary care clinicians
- Experts mentor and share their expertise across a virtual network

ECHO Partners

Tele-ECHO Clinic

- Acquire new skills and competencies
- Become part of a community of practice and learning
- Gain access to inter-professional team of specialty providers and colleagues to offer support in how to manage patients with complex conditions
- Increase their professional satisfaction

- Helps provide better access for patients in rural and underserved communities
- Reduces treatment disparities
- Provides rapid dissemination of new knowledge
- Promotes consistency in care and practice
- Spreads knowledge, expands capacity and accelerates collective wisdom

Help! It might be Autism ECHO Curriculum Includes:

Autism identificationTuesday, April 3

Red flags....Tuesday, April 10

School-child with behavioral concerns.....Tuesday, April 17

Help following an Autism diagnosis.....Tuesday, April 24

No fee for participation - CE available
