Empowering Communities
Extended for Community Healthcare Outcomes

Moving Knowledge, Not Patients
ECHO uses video-conferencing technology to offer mentoring. Connect from your computer, with a webcam and microphone, a tablet or smartphone to gain access to case-based learning and interdisciplinary teams.

ECHO Partners
• Acquire new skills and competencies
• Become part of a community of practice and learning
• Gain access to inter-professional team of specialty providers and colleagues to offer support in how to manage patients with complex conditions
• Increase their professional satisfaction

Tele-ECHO Model
• Collaborative education
• Democratize and de-monopolize knowledge linking inter-disciplinary specialty team with multiple primary care clinicians
• Experts mentor and share their expertise across a virtual network

Tele-ECHO Clinic
• Helps provide better access for patients in rural and underserved communities
• Reduces treatment disparities
• Provides rapid dissemination of new knowledge
• Promotes consistency in care and practice
• Spreads knowledge, expands capacity and accelerates collective wisdom

Kansas Connecting Communities ECHO

Kansas Connecting Communities is a grant funded initiative with a goal of increasing universal screening of pregnant and postpartum women for mood/anxiety and substance use disorders. We are hosting this regional event as a means of providing education as well as opportunities for collaboration and partnership.

CME/CNE/CE: For information regarding continuing education credit, please access the links for each of the specific sessions that will be found in the session’s agenda.
