

# Telehealth ECHO:

## Sustaining Telehealth Beyond COVID-19

**SESSIONS** Noon-1pm

### WHEN:

4<sup>th</sup> Friday of the Month beginning  
January 22nd - September 24th, 2021

### REGISTRATION:

<http://bit.ly/TelehealthECHOBeyondCOVID>

### OPEN TO:

While helpful to everyone, this series is specifically designed for organizations and providers who have started using telehealth and are interested in understanding how to strategically plan for sustainable telehealth programs.

### LEARNING OBJECTIVES

**At the conclusion of this ECHO series participants should be able to:**

- Establish a foundation for sustainability in telehealth services.
- Implement long-term strategies for providers and organizations using telehealth in the future.

Whether you are new to telehealth or have established telehealth programs, we want to hear about your experiences and needs related to telehealth utilization in response during rapid implementation. Please consider sharing your telehealth journey, questions, barriers, challenges, solutions, and resources with the broader ECHO collaborative learning experience.

### CASE STUDIES:

This ECHO series focuses on assisting diverse healthcare organizations and providers sustain telehealth programs beyond the COVID-19 public health emergency. Participants are encouraged to share system-level and patient-based cases to enrich the collaborative learning process.
