

## Criteria for ovarian tissue banking

- 1) Age: under 41 years
- 2) Ovarian function: premenopausal by FSH, antral follicle count or AMH
- 3) Communication with oncologists: cancer treatment plan, prognosis
- 4) When embryo freezing or oocyte freezing is not indicated: delaying cancer treatment is not acceptable, hormonal stimulation is not permitted, ART is not allowed.
- 5) Prepubertal girls who does not have any other options
- 6) High risk for POF (when significant loss of ovarian follicles is anticipated with cancer therapy)
- 7) Informed consent from adult patients
- 8) Informed consent from parents/ guardians as well as informed assent from minors, if the patient is less than 18 years
- 9) Physically and mentally healthy enough for surgery
- 10) Desires to have a child in the future (preferably before the age 50)
- 11) Thorough patient counseling: currently available fertility preservation options including embryo and oocyte cryopreservation, how to use cryobanked ovarian tissue for fertility restoration
- 12) Should understand experimental nature
