KU Eye Newsletter
Summer 2009 • Volume 1, Issue 1

WE PROUDLY EMBRACE OUR RICH HISTORY AND STRIVE TO LEAVE SUCH A LEGACY

In 1880, the School of Medicine was a two-year medical preparatory program on the Lawrence campus. Dr. Simeon Bell envisioned a teaching hospital – educating future physicians – and, through Dr. Bell’s generosity and dedication, the school and Bell Memorial Hospital have been at their current location in Kansas City, Kansas, since 1924.

Ophthalmology has been a required course of study for medical students at the University of Kansas since 1905-6. It was not until 1914, however, when the Department appointed its first Chairman, E.J. Curran, M.D. Dr. Curran, commonly considered as the Founding Father of the Department, is credited as instrumental in

establishing the Department such that it has been able to prosper.

Outgrowing the second floor Sudler location and the long-term goal to create an Eye Institute of Excellence, the Department of Ophthalmology moved off the School of Medicine campus to its current location on State Line Road. While physically separated, the Department is in no way separate from the School of Medicine’s tradition of excellence in patient care and education or in its dedication to our community.

Selected for its greater access to the growing parts of Johnson County, the office at State Line Road also provides the convenience of a covered drop-off entrance and ample close-by parking.

KU Eye Center opens its new facility At 7400 State Line Road, Prairie Village, KS, June 2007.

1980-Aerial view of KU Medical Center (Rainbow Boulevard in foreground).

JOHN SUTPHIN JR., M.D. CHAIR OF OPHTHALMOLOGY

Welcome to our inaugural newsletter for KU Eye!

Let me begin by thanking each of you for the confidence you have invested in the University of Kansas Department of Ophthalmology and especially in me as the new Chairman. I appreciate all of the support I have received, both in being selected for this honor, as well as the ongoing collaboration in making the Department as great as we know it will be.

Dr. E.J. Curran founded the Department in 1914 and the first residents were trained in 1946. Over time, a real synergy developed among the department, the school and hospital, our patients and our alumni. This first newsletter is dedicated to honoring our past and acknowledging our present status, while offering a glimpse into our promising future. I look forward to hearing all of your memories of the department, and especially about our history, from the time of our founding almost 100 years ago, and how our future should look.

Because we value our alumni and our history, we make every effort to update and maintain what we hope is a complete alumni list. We will provide this list to the alumni for whom we have information, with the hope that they contribute with information and assist in identifying others, both living and passed, so that we have a thorough and accurate record. In keeping with this desire, we recently mailed invitations to all alumni to our 25th Annual Lemoine Alumni Reception, which is 5:30-8:30 p.m., Saturday, October 24th at the InterContinental, San Francisco, CA. Dr. Martin Mainster will be attending to renew acquaintance with his many former residents and fellow faculty.

We will also develop lists of all our friends and champions in ophthalmology, who may or may not be alumni but wish to become more connected and part of our synergy for building a world class department here in Kansas.

As we go to press, we learned that KU EYE is included in the top 100 Ophthalmology Hospitals on US News and World Reports! (<http://health.usnews.com/health/best-hospitals/ophthalmology-hospital-rankings/>.) This is a great tribute to our fine faculty and growing reputation.

As important is my commitment to today's department, so is my dedication to honoring the past that brought us to this point. Our ambitions for the future are built on that foundation and on the strengths of our current faculty and residents. To that end, this newsletter will also present our current residents and faculty to keep you abreast of what is happening here in Prairie Village, just south of Kansas City, Kansas.

Please feel free to contact me through email (jsutphin@kumc.edu) or by phone (913-588-6606) or letter (7400 State Line Road, Prairie Village, KS 66208). I assure you that you will each get a personal answer; I am very much interested in your thoughts.

Happy reading!

John Sutphin Jr., M.D.

KU OPTICAL NOW OPEN

In keeping with the mission of providing exceptional, full service eye care, KU Eye Center now offers the extra convenience of an onsite optical shop.

Here, patients can browse the over 500 frames and fill their prescriptions for eyeglasses and frames, sunglasses, readers and contact lenses.

The KU Eye Center's ophthalmologists provide specialized eye care with expertise in such areas as corneal diseases, dry eye, eye infections and trauma, glaucoma, low vision, neuro-ophthalmology, pediatric ophthalmology, refractive surgery and retinal diseases. In addition Dirck DeKeyser, OD, provides a full line of optometry services and Optician Debra Moore offers free adjustments and

cleaning of eyewear.

Conceived for the convenience of KUMC employees and desire to better serve our low-income patients, the new optical shop accepts a variety of insurances, including VSP, Superior Vision, Medicare and Medicaid. KU

COME SEE THE
NEWLY OPENED
KU OPTICAL

Eye can accept prescriptions from all providers.

The optical shop will be open Monday through Friday from 7:45 a.m. to 5 p.m., until 6 p.m. on Thursdays, with additional hours planned.

For more information about the optical shop, ophthalmology services or specialists call 913-588-6624.

BEST DOCTORS IN AMERICA® 2007-2008 KANSAS OPHTHALMOLOGY, SEPTEMBER 25, 2008

We are proud to share the following list of KUMC physicians who are included in the Best Doctors in America® 2007-2008 published September 25, 2008.

RESEARCH PROGRAMS IN THE DEPARTMENT OF OPHTHALMOLOGY

RESEARCH PROGRAMS IN THE DEPARTMENT OF OPHTHALMOLOGY

The Ophthalmology department at KUMC has a longstanding history of research and scientific contributions and is evidenced by current faculty, including Martin Mainster, MD, PhD and George Timberlake, PhD. Dr. Mainster is the Luther L. Fry Endowed Professor of Ophthalmology. Dr. Mainster specializes in macular and retinal vascular disorders. His innovations, which have become standard ophthalmic practice, include UV-protective IOLs, aspheric contact laser lenses, the crossed-beam

1980: Drs. Crockett & Kavi
Kansas Lions Clin. Eye Research Lab

photodisruptor aiming system, and clinical applications of scanning laser ophthalmoscopy. Soon to graduate to Professor Emeritus, Dr. Mainster is the recipient of the American Academy of Ophthalmology's Honor and Senior Achievement Awards. He has written over 30 scientific publications and is an author on 7 patents. He is recognized for his scientific contributions in retinal biophysics and imaging, laser instrumentation, ocular light hazards, macular disease, physiological optics and photopigment kinetics.

Dr. Timberlake's research focuses on the physiology of eye movements, physiological optics, laser-tissue interaction, and the effects of macular scotomas on visual function. In addition, he developed a computer-based automated visual acuity tester, and a device for stabilizing a laser beam on the retina for retinal photocoagulation. He has a joint appointment in the Department of Chemistry where he developed light-activated collagen-crosslinking compounds for corneal wound closure with Professor Richard Givens.

Dr. Timberlake developed the method for presenting

visual stimuli in the scanning laser ophthalmoscope and was the first to use this method for characterizing visual function in individuals with macular degeneration. His present grant-funded research involves study of the effects of macular scotomas on performing manual tasks.

John Sutphin, MD, Chair of the Ophthalmology Department since December 2006, has been instrumental in renewing the Department's commitment to research. Adding one new researcher already, he actively seeks new faculty in oculoplastics and glaucoma. Dr. Sutphin brings his own vast experience in research in the area of corneal diseases and refractive procedures. His specific research interests include

Drs. Richard Underwood and A.N. Lemoine, trying out the
Argon Laser, 1971

keratitis diagnosis and management, corneal topography including three-dimensional analysis of refractive surgery results, wavefront analysis, the introduction of novice surgeons to small incision cataract surgery and refractive surgery, and comparison of outcomes of two corneal transplantation procedures (DMEK vs. DSAEK).

Tom Whittaker, MD, JD, a renowned clinician for his neuro-ophthalmology expertise, serves as an investigator in many clinical trials for neurological diseases, currently as the KUMC site primary investigator for a nationwide study examining the effectiveness of peripheral prism glasses in the treatment of homonymous hemianopia. Currently, Dr. Whittaker is seeking patients to participate in two additional studies. One is a non-treatment/observational study of nonarteritic anterior ischemic optic neuropathy (NAION)

in males over the age of 45. These patients must be enrolled within three weeks of onset. The other study involves a drug treatment for acute optic neuritis (AON) in males and females over the age of 18. Patients in this trial must be enrolled within nine days of onset.

In order to offer patients the opportunity to participate in either study, referrals of patients suspected to have or diagnosed with either NAION or AON should be directed to Becky Bothwell, Research Coordinator, at 913-588-0105, for screening and scheduling.

William Godfrey, MD, is restarting a research program from which he has previously gathered much data. He recently was awarded a \$19,000 grant from the Kansas Lions Sight Foundation to examine the choroidal mast cell in rats in order to

Drs. R.C. Andrew Symons and Thomas J. Whittaker, 2009

identify the chemicals released by these mast cells and the role they play in vascular processes in the posterior pole of the eye.

R.C. Andrew Symons, MD, PhD, who joined KU Eye in September 2008, is seen at bottom of page in his Genetics Laboratory, located in Smith Hall. Dr. Symons is working to discover the genes which make some mouse strains more likely than others to develop retinal blood vessel damage when exposed to high oxygen levels. The mouse model that he uses is very similar to the human disease Retinopathy of Prematurity, which is one of the major causes of severe visual impairment in children. Dr. Symons expects that this work will be relevant both to Retinopathy of Prematurity and to diabetic retinopathy. The Kansas Lions Sight Foundation and the Kansas University Medical Center (KUMC) have committed to supporting Dr. Symons' work up to \$100,000 per year for

three years. Dr. Symons was also awarded an external grant of \$40,000 from the Knights Templar Eye Foundation to support this work in 2009.

Dr. Symons received \$25,000 in start up funds from the Lied Endowed Basic Science Pilot scheme and a \$20,000 Clinical Research Feasibility Funds (CRFF) Grant from KUMC General Clinical Research Center to support his collaboration with researchers in Melbourne, Australia and Pittsburgh, PA to find genetic markers which influence susceptibility to diabetic retinopathy.

Retina Study Unit, 1970s

Dr. R.C. Andrew Symons readies his lab. Experiments started in February 2009; expected to be fully functional by October, 2009

The KU Residency Program began in 1946 with two residents, Robert Polson, M.D. and David Loy, M.D. A one-year program, both were the first graduates in 1947. The next class was also two residents, Earl Padfield, M.D. and Fred Bosilevac, M.D. "We were the first two-year residents. Pad, Earl Padfield, and I started the 7th of June 1947 and we finished in '49, June the 6th," said Dr. Bosilevac in a 2007 interview. The program remained two years until 1956, when it went to three years, as was the standard. In 1988, changing to a four-year residency to allow for a year of research was tried but, lacking adequate research support, in 1993, it reverted back to three years, as it is today.

Growing the residency program, however, was affected by many factors, such as World War I claiming many physicians in service, The Great Depression and the very structure and availability of instruction being primarily in private practices. Larry L. Calkins, M.D., graduate of the KU School of Medicine in 1945 and faculty in the Department of Ophthalmology from 1952-1965, credited the promotion and growth of the residency program chiefly to Al Lemoine, M.D. Additionally, Dr. Calkins pointed to Ophthalmology becoming autonomous rather than a section of another department, such as surgery, as having "materially assisted

the development of a first-class residency training program."¹ Since 1946, 135 residents have joined the Lemoine Alumni.

an additional expense to them and a loss of time at work. This microscope is also used to educate the public and

The Department of Ophthalmology's long-standing partnership with the Lions Clubs is genuinely treasured and not just for their reliable and incredible financial support but also for the awareness and promotion of understanding issues of blindness and vision in the larger community. Through Lions Recycle for Sight, Lions World Sight Day, White Cane Day and Candy Day - just to name a few - the Lions increase awareness of the need for quality eye care.

The generosity of the Lions has made possible a number of purchases over time, with the most recent large purchase the Leica Microscope (seen at the left) in August 2007. Having this operating microscope in the clinic enables performing a number of procedures that might previously have required patients going to the hospital to have, at an additional expense to them and a loss of time at work. This microscope is also used to educate the public and

to train residents, as well as medical students, in various surgical procedures, so that they can continue the good care of Kansas Ophthalmology.

KU EYE DONOR PARTNERSHIP

As our partners, the Donors acknowledged here have made it possible for the Department of Ophthalmology to pursue excellence in educating physicians and scientists to serve the healthcare needs of Kansas; in providing superior eye care for patients and in discovering and applying new knowledge through basic and clinical research.

We salute their exceptional generosity and thank them for their gifts of love and caring.

ANNOUNCING THE APPOINTMENTS OF ERICA A. PERSON, M.D. AND ROBERT A. RYMER, M.D.

The ophthalmology team at The University of Kansas Hospital is pleased to announce the appointment of Clinical Instructor Erica A. Person, M.D. and Assistant Professor Robert A. Rymer, M.D.

Erica A. Person, M.D.

Dr. Person specializes in comprehensive ophthalmology and joins as full-time Faculty September 1, 2009.

Earning her Medical Degree from St. Louis University, Dr. Person completed a one-year internship at Forest Park Hospital, also in St. Louis. Fellowship trained at Washington University Eye Center in St. Louis, Dr. Person recently completed her Residency in Ophthalmology at the University of Missouri - Kansas City.

Robert A. Rymer, M.D.

Dr. Rymer will provide coverage of inpatient consultations on a part-time basis.

After attaining an M.D. from the University of Colorado Medical School in Denver, Dr. Rymer completed a rotating internship at Barnes Hospital in St. Louis, where he remained for his Fellowship in Ophthalmic Pathology. Dr. Rymer then completed a Fellowship in Cornea and External Disease at

Ohio State University in Columbus, Ohio. His Residency in Ophthalmology was at the University of Wisconsin in Madison, Wisconsin. Dr. Rymer served two years in the United States Navy attaining the rank of First Lieutenant. He served aboard the USS Coral Sea and at the US Naval Station at Treasure Island as a General Medical Officer.

PHYSICIANS: For consultations, call 913-588-6601 or 913-588-5862/877-588-5862 to leave a message.
To transfer patients, please call the Transfer Center at 877-738-7286, which is answered 24/7.

Locally, the Department of Ophthalmology is blessed with a rich educational network made possible by our incredible faculty, residents and alumni, as well as ophthalmologists and optometrists throughout the State of Kansas.

Returning to successful traditions from the past, such as the Annual Ophthalmology Course, is one way in which we strive to continue and foster our relationships, educational opportunities and professional development.

While short notice and learning the ins and outs of CME-accreditation created somewhat of a challenge for our June conference, those minor

hurdles were easily overshadowed by the impressive presentations given by our Faculty and Residents and our invited speakers, John W. Cowden, M.D., Professor and Chairman, University of Missouri – Columbia, and 2008 KUMC Residency Alumni, Natalia Villate, MD, now Staff Physician at Visual Health and Surgical Center, Palm Springs, Florida. Our appreciation for everyone giving of their time and talents is beyond words!

Nationally, the Department has been fortunate to host and bring in renowned speakers, experts and guests to share their knowledge and experiences, as well as to extend our community.

Dr. Al Lemoine presenting engraved tray, award for Robison Lecture, to Dr. Leslie Nesmith at the 1986 Annual Ophthalmology Course.

June 12-13, 2009: First Annual University of Kansas Department of Ophthalmology, Lemoine Alumni Society and Kansas Society of Eye Physicians and Surgeons (KSEPS) Joint Conference for Ophthalmologists.

William Godfrey, M.D. Charles L. Schepens, M.D. Leslie Nesmith, M.D.

Over 10 years ago, the Department of Ophthalmology had the great honor of hosting Dr. Charles Schepens when he visited and toured KU. Dr. Schepens developed the indirect ophthalmoscope, changing ophthalmology, and specifically retina diagnostics, forever and immeasurably. Dr. Nesmith (KUMC residency alumni, 1972), went on to study under Dr. Schepens in Boston.

In keeping with the tradition of hosting distinguished and nationally known physicians, KU Eye was proud to have Visiting Professors Drs. Arnold and Golnik lecture to residents and faculty from KUMC, the University of Missouri - Kansas City and local ophthalmologists and optometrists as a kick-off to the Kansas City Society of Ophthalmologists and Optometrists (KCSO&O) Annual Meeting in January 2009.

RIGHT TO LEFT: Anthony C. Arnold, M.D., Thomas J. Whittaker, M.D., Karl C. Golnik, M.D., M.Ed. Dr. Arnold is Professor and Chief, Neuro-Ophthalmology Division, Jules Stein Eye Institute, UCLA where he is also Residency Program Director and Director of the UCLA Optic Neuropathy Center. Dr. Golnik is Professor of Ophthalmology, Neurology and Neurosurgery at the Cincinnati Eye Institute and also the Vice-Chair and Residency Program Director of the Department of Ophthalmology.

THROUGH “ACTS OF FAITH AND GOOD LUCK,” OPERATION BREAKTHROUGH NOW HAS AN EYE CLINIC

Squinting, a girl peeps in the doorway of Operation Breakthrough’s new vision clinic and calls, “Hi Dr. T!”

“Dr. T.” – also known as Ophthalmologist Terry Curran – notices the squint and says, “Where are your glasses?”

Giggling, the girl digs them out of her backpack.

“In the case or on your face,” Dr. T. says, smiling.

Everything about this vision clinic makes Dr. T. smile. He looks around at the shiny new equipment and says, “I am the luckiest man in the world.”

Two years ago, Dr. Curran was paralyzed, a rare reaction to a viral infection. When he recovered, he decided to re-focus his medical mission work from South America to people in need in his own hometown. By chance, he heard about Operation Breakthrough. Friends and family caught his enthusiasm and donated toward the project.

“There were acts of faith and good luck,” Dr. T. said. “The path led from A to Z, and all of a sudden we’ve got this beautiful eye clinic.”

Donors to date include The Tholen Family, Pat Curran, Del Kimball, Karen Cooper and St. Luke’s Foundation.

The only thing Operation Breakthrough has purchased for the clinic so far is a bulletin board, said Lindsey Weaver, health and disabilities coordinator. “Everything else was essentially given to us.”

Dr. Terry Curran, above, in the newly installed vision clinic at Operation Breakthrough.

Since the clinic opened in December, dozens of children have received glasses, which cost only about \$40 a pair, thanks to a partnership with Midwest Lens. A hundred children have had their vision tested. Soon, Dr. T. plans to open the clinic to their parents and eventually the broader community.

“We have a lot of potential here,” Dr. T said, beaming, “to help a lot of people.”

Race for the Cure.

Adopt-A-Family/Staff Holiday Party.

KU Eye Center was also a Walk-On Sponsor of the Chiefs Charity Game, August 29, 2009, in addition to the 25 individual sponsors of staff, faculty and residents.

CONGRATULATIONS TO KU EYE CLASS OF 2009 RESIDENTS!

LEFT: Michelle Yao, M.D. entered private practice in comprehensive ophthalmology on Long Island, New York.

CENTER: Hasan Bahrani, M.D. began a Retina Fellowship with a private non-hospital practice based out of the Massachusetts Eye and Ear Infirmary, Boston, MA.

RIGHT: Erin Stahl, M.D., recipient of the Alan W. Riley Award, started a one-year Fellowship in Pediatric Ophthalmology at Children's Mercy Hospital, which will be followed by a year-long Fellowship in Cornea and Refractive surgery at Durrie Vision and KU. Her future plans are to specialize in pediatric refractive surgery and cornea.

IN THE NEXT ISSUE, LOOK FOR AN INTERVIEW WITH DR. FRED BOSILEVAC, KUMC RESIDENCY ALUMNI, CLASS OF 1947

WE WANT YOUR NEWS!!

WITH YOUR ALUMNI NEWS AND EVENTS.

DECEMBER 2008

Above: Dr. Berger just snagged his first ever steelhead of 28 inches at 6 pounds

Right: Dr. Christensen proudly displays his 30-inch, 7-pound steal from Lake Erie.

Former KUMC residents Ryan Christensen (2008 graduate) and Ravi Berger (2006 graduate) met up in Ohio, where Dr. Berger is Assistant Clinical Professor at the Metrohealth Medical Center. Dr. Christensen (KUMC Alumni MD, 2004) practices as volunteer faculty at KU Eye, and is full-time at Retina Associates, PA, in Overland Park, KS.

CONGRATULATIONS

Congratulations to Scott J. Fudenberg who recently joined The Anna and William Goldberg Glaucoma Service and Research Center at the Wills Eye Institute!

Dr. Fudenberg completed his ophthalmology residency in 2007, during which he was also co-chief resident.

Congratulations also to Eric Fry, M.D. (KUMC Alumni MD 2003; Residency 2007) on becoming Board Certified in Ophthalmology in December 2008!

LEMOINE ALUMNI RECEPTION SATURDAY, NOVEMBER 8, 2008, ATLANTA, GEORGIA

ANNOUNCEMENTS

VOLUNTEERS NEEDED

The Department of Ophthalmology seeks individuals passionate about eye care and Kansas to serve on the Advisory Board for a New Eye Institute for the State of Kansas.

NEWSLETTER ITEMS/IDEAS NEEDED

Your input and ideas are important to us and developing this newsletter is no exception! Please send suggestions for folks to interview; topics to explore; current events; alumni news; congratulatory notices – any information you would like to see included, as we endeavor through the initial stages of what is designed to be a helpful and informative communication catalyst.

CALENDAR OF EVENTS

Alumni Golf Outing

Dr. Terry Curran is organizing an alumni golf outing during the AAO! Please indicate your interest in participating and day preference - either Saturday or Sunday morning (Oct. 24 or Oct. 25) - to Deb Kephart at 913-588-6606 or dkephart@kumc.edu.

Grand Rounds are held at KU Eye Center

5 p.m. on the second and third Wednesdays of each month, as well as at 7:30 a.m. on the fourth Wednesday of each month. Also, specialty-specific Journal Clubs are held every other month, with the next on September 23rd at 6 p.m. Please contact Audrey Morrison for information and to RSVP at amorrison@kumc.edu or 913-588-6660.

Lemoine Alumni Reception

Saturday, October 24, 2009
5:30 p.m. - 8:30 p.m.
InterContinental, Fremont Room,
888 Howard St., San Francisco, CA. For information or to RSVP, please contact: Deb Kephart at 913-588-6606 or dkephart@kumc.edu.
