

Kansas SEARCH

Program Description

The Student/Resident Experiences and Rotations in Community Health (SEARCH) program provides experiences in underserved areas of Kansas through Community Health Centers and other safety-net clinics.

Qualifying Students/Residents Programs

- Physician
- Nurse Practitioner
- Physician Assistant
- Dentist
- Dental Hygienist
- Psychologist
- Clinical Social Worker
- Public Health Administration

Population Served and Location

SEARCH encourages development of the necessary skills, knowledge and attitudes to work effectively and respectfully across cultures and socioeconomic group by providing experience and training in the following:

- interdisciplinary primary care (medical, dental, behavioral health) settings that integrate principals of cultural competency in their system of care,
- working with those in poverty, and
- working with persons from diverse backgrounds including those who live in critically underserved areas.

Look at the map on the back for clinic and center locations.

Time Commitment

Placements are a minimum of two consecutive weeks.

Stipend

A stipend will be given for travel, food and lodging costs. Information regarding disbursement of the stipend will be provided after acceptance. Contact us for more specific information.

Training Sites

SEARCH training sites are located in health professional shortage areas in Kansas and are in both rural and urban settings. The emphasis is on placing students in Kansas Association of the Medically Underserved (KAMU) member clinics. These sites see all patients regardless of ability to pay and have a sliding fee scale.

Highlighted counties contain one or more potential SEARCH clinics.
