

DEEMED EXPORT QUESTIONNAIRE FOR INTERNATIONAL STUDENTS

Export Control Laws: What is a Deemed Export?

Export control laws are designed to prevent the export of unlicensed sensitive equipment, software, and technology to ensure U.S. national security and foreign policy objectives. Export control is regulated by multiple U.S. agencies. These laws can result in severe fines and prosecution. This liability applies to KUMC and you as a private citizen.

Export of sensitive equipment, software, or technology can occur when it is:

- Available to foreign nationals for visual inspection (such as reading technical specifications, plans, blueprints, etc.)
- Exchanged orally
- Made available by practice or application under the guidance of persons with knowledge

The Deemed Export Questionnaire is aimed at determining whether an export license will be required before releasing controlled technology to a foreign person.

Please note: information or research data shared within the scientific community or to the public is generally exempt from export control laws under the Fundamental Research clause. Nonetheless, the completion and review of the deemed export questionnaire is still required.
