Join the NeuroWalk Study

WHAT IS NEUROWALK?
This study explores the connection between walking and cognition for those with Alzheimer’s disease (AD). The study team will be looking at how energy production in cells (mitochondria) might be linked to walking issues.

WHO CAN PARTICIPATE?
• People aged 65-85 years old.
• Able to walk for 2-minutes without rest, or assistance.
• Diagnosed with Alzheimer’s disease.

STUDY DETAILS
• Only one study visit is required.
• Participants may receive compensation for their time.
