

*Do YOU, or  
someone you know,  
have dementia  
with Lewy bodies?*

## **CONSIDER THE SHIMMER COG1201 STUDY**

The SHIMMER COG1201 study is an investigational medication trial assessing the safety of CT1812 (pill medication) as a possible treatment for people diagnosed with mild to moderate dementia with Lewy bodies.

### **ARE YOU...**

/ Age 50–85 and diagnosed with dementia with Lewy bodies?

### **WHAT TO EXPECT?**

- / Take either CT1812 or a placebo (33% chance of placebo)
- / Attend 12 study visits over approximately 8 months
- / Blood draws
- / Possible MRI or CT scans
- / Memory tests
- / Vital signs
- / Optional Lumbar puncture
- / Skin biopsy

*We need YOU to participate  
in this important study.*
