1. For the School of Medicine and its departments, the public rank should match those published by the Blue Ridge Institute for Medical Research (BRIMR). Any differences would reflect instances where BRIMR includes non-medical schools in the data. See <https://brimr.org/notes-on-methodology-2022> for more details. Since BRIMR does not produce a rank for schools of (allied) health professions, this rank is produced internally.

2. Public rank is internally calculated by the Office of Enterprise Analytics

3. PI Count is based on the contact principal investigator listed on the award
