

# KU Medical Center Volunteer Appointment Information

## **Background**

In order to recommend a volunteer appointment there must be a specific reason; the person is a specialist, preceptor, or collaborator and the nature of the volunteer faculty member's accomplishments are reviewed every three years. Modifiers for the appointment are determined by career and accomplishments. A volunteer fulfills his/her duties by teaching, community service and developing community support for KUMC, and participating in department and institutional activities. Volunteer appointments last for a maximum of 3 years. Initial communication is through US Mail, renewals are electronic, and notices of non-reappointment are through the US Mail.
