Leveraging Technology in Medical Education Series

KICKOFF & SIX-PART SERIES

Zoom

This series explores the transformative potential of incorporating innovative technological tools and platforms to enhance learning, collaboration, and clinical skills development in the field of medicine.

Beyond the Hype: The Role of Technology in Medical and Surgical Education

Eric Gantwerker, MD, MS, MMSc

7:00 a.m. Thursday, September 07

There has been an explosion of news and research around the "new" technologies of Artificial Intelligence (AI), Virtual and Augmented Reality (AR and VR), and many other technologies that promise to change the world we live in. **Read More >>**
