

To make sure your health providers/facilities are within the network visit the following websites:

You can search by State, city, zip code, specific provider or facility name, or all facilities or physicians in a particular field of medicine.

- The network in Kansas – www.providrscare.net
- The network outside of Kansas – www.myfirsthealth.com

Claims to your insurance are first sent to Providrs Care to process. If the claim is within the Providrs Care network, it is processed at that point. If the physician or facility/group is not within Providrs Care network, the claim is sent back to Allied Benefits (the health insurance provider). Allied Benefits will then run the claim through the First Health Network. If the claim is found in the First Health Network, the services will still be considered in-network. Only claims for services not found in Providrs Care Network or First Health Network are considered out-of-network claims.
