

CANCER MOONSHOT

Join fellow cancer patients, advocates, researchers, community leaders, and health care professionals, along with staff from the Department of Health & Human Services, to explore the impact of cancer in our community. We will share updates and discuss efforts to accelerate progress in cancer prevention, diagnosis, treatment and care.

Your feedback can help steer the Cancer Moonshot, a comprehensive program with the goal of reducing the cancer death rate by at least 50% over the next 25 years and improving the experience of living with and surviving cancer.

5:30-7 p.m. | Thursday, Feb. 23 | 2023

KU School of Medicine-Wichita
1010 N. Kansas, Wichita, KS 67214
